<b>Investment Objective</b>	<p>The objective of the Scheme is to generate income by investing in debt and money market instruments maturing on or before the beginning of the immediately following Specified Transaction period of the scheme.</p> <p>There can be no assurance that the investment objective of the Scheme will be realized.</p>								
<b>Interval Period</b>	370 days								
<b>Asset Allocation Pattern of the Scheme</b>	<p>Under normal circumstances, the asset allocation of the Scheme will be as under: -</p> <table border="1"> <thead> <tr> <th>Asset Class</th> <th>Indicative allocations (% of total assets)</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Domestic Debt Instruments including Government Securities &amp; Money Market Instruments</td> <td>0%-100%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The Scheme retains the flexibility to invest across all the securities in the debt and money markets as permitted by SEBI/RBI from time to time.</p> <p>The Scheme will not participate in Repo in corporate debt security and Credit Default Swap. The Scheme will not invest in script lending. The Scheme will not invest in equity linked debentures.</p> <p>The Scheme will not invest in foreign securities. The Scheme will not invest in derivative. The scheme will not invest in securitised debt.</p> <p>As per the SEBI Circular dated November 26, 2010, the investments shall be made in such securities which mature on or before the opening of the immediately following Specified Transaction Period. The cumulative gross exposure through debt and, money market instruments shall not exceed 100% of the net assets of the Scheme.</p> <p>The scheme would rebalance deviations, if any, from the above mentioned asset allocation as follow:-</p> <ul style="list-style-type: none"> <li>For scheme with a tenure at inception of more than 6 months - 30 days</li> </ul>			Asset Class	Indicative allocations (% of total assets)	Risk Profile	Domestic Debt Instruments including Government Securities & Money Market Instruments	0%-100%	Low to Medium
Asset Class	Indicative allocations (% of total assets)	Risk Profile							
Domestic Debt Instruments including Government Securities & Money Market Instruments	0%-100%	Low to Medium							
<b>Investment Strategy</b>	<p>The Fund Management team endeavours to meet the investment objective whilst maintaining a balance between safety and return on investments. Since the scheme is similar to a close ended scheme with a defined maturity, the fund manager would invest in securities maturing within the maturity period of the scheme i.e. before the beginning of the next Specified Transaction Period of the Scheme. The Scheme shall be actively managed and the Fund Management team may endeavor to generate returns whilst moderating credit and interest rate risk. The Fund Manager shall formulate a view of the interest rate movement based on various parameters of the Indian economy, as well as developments in global markets.</p> <p>Investment views/decisions inter alia may be taken on the basis of the following parameters:</p> <ul style="list-style-type: none"> <li>Returns offered relative to alternative investment opportunities.</li> <li>Prevailing interest rate scenario</li> <li>Quality of the security/instrument (including the financial health of the issuer)</li> <li>Maturity profile of the instrument</li> <li>Any other factors considered relevant in the opinion of the Fund Management team.</li> </ul> <p>The Scheme may try to identify securities that yield relative value over others for similar risk and liquidity level. Various analytical tools like yield curve analysis, spreads between asset classes, horizon returns, forward implied interest rates, may be deployed to evaluate various investment options.</p> <p>Investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst these cannot be done away with, they may be minimized by diversification.</p>								
<b>Disclosures of Credit Evaluation Policy, Negative list of sector, Type of Instrument etc.</b>	<p><b>a) Credit Evaluation Policy:</b> We maintain a 'fixed income' universe of approved securities for all the fixed income portfolios.</p> <p>Credits are researched through a credit research exercise which includes inter-alia, meeting with borrower (usually includes the finance team and senior management/ personnel in decision making roles) and the rating agencies (could also be a concall) to understand the business/financial and business prospects/credit outlook. In addition, financial analysis is carried based on past performance.</p> <p>Emphasis is also laid on reviewing the non financial aspects such as promoter track-record, audit quality and market intelligence.</p> <p>All names are researched by the analyst and discussed with the head - fixed income and the same are approved by Investment Committee and included in the universe.</p> <p><b>b) Negative list of sectors:</b> The Scheme will not invest in the securities of Airlines, Gems and Jewellery.</p> <p>Further, the total exposure of the Scheme in a particular sector (excluding investments in Bank CDs, Short Term Deposits with Scheduled Commercial Banks, CBLO, G-Secs, TBills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 25% of the net assets of the scheme. However, the Scheme can have an additional exposure to financial services sector (over and above the limit of 25%) not exceeding 5% of the net assets of the scheme in Housing Finance Companies (HFCs). The additional exposure to such securities issued by HFCs should be rated AA and above and these HFCs should be registered with National Housing Bank (NHB) and the total investment/exposure in HFCs shall not exceed 25% of the net assets of the Scheme. The sectors will be considered as per AMFI classification.</p> <p><b>c) Type of instruments in which the Scheme propose to invest in:</b> Commercial Papers and Certificates of Deposits</p>								

d) Intended allocation against each sub asset class/credit ratings will be as per below matrix:

Instruments	Credit rating				
	A1+	AAA	AA	A	BBB
Certificates of Deposits	20%-25%	–	–	–	–
Commercial Papers	50%-55%	–	–	–	–
Non Convertible Debentures/Bonds	–	–	25%-30%	–	–
Structured Obligations including Securitized Debt	–	–	–	–	–
Cash & Cash Equivalents (CBLO, Reverse Repo, T Bills)	–	–	–	–	–

- a) In case of Certificates of Deposits and Commercial Papers, the Scheme will invest in the instruments with the highest credit rating i.e. A1+.
- b) Each of the rating categories such as AA, A etc would also include ratings with '+' and '-' i.e. AA rating will include AA+ and AA- also. The respective rating categories also include ratings with the suffix 'so'; issued by credit rating agencies for structured obligations.
- c) There will not be any variation between intended allocation and actual allocation except in following cases:
- In case of credit ratings of sub assets class, there could be a possibility of positive variation in investments towards higher credit rating of the same instruments.
  - At the time of building up the portfolio post STP and toward the maturity of the Scheme, there may be a higher allocation to cash & cash equivalent including units of debt/ liquid schemes.
  - In case of non availability of CPs or after taking into consideration of risk factors associated with CPs, the Scheme may invest into CDs of highest credit rating (A1+)/CBLO/T-bills. Such deviation may continue till suitable CPs of desired credit quality is not available.
  - Further, the allocation may vary during the tenure of the Scheme. Some of these instances are: (i) coupon inflow; (ii) the instrument is called or bought back by the issuer (iii) in anticipation of any adverse credit event. In case of such deviations, the Scheme may invest in Bank CDs of highest rating/CBLOs/ Reverse Repo / T-Bills.
- d) If there is any deviation from floor and ceiling of the credit ratings specified for instruments, the same will be rebalanced within 30 days from the date of deviation.
- e) All the investments will be based on the credit ratings available/prevalent at the time of the investments.
- f) In case, there is dual credit ratings available for the same instruments, the most conservative rating publicly available at the time of investments will be taken into consideration at the time of investments.
- g) The Scheme will not invest in unrated papers.
- h) The Scheme will not invest in derivatives.
- i) In case of subsequent Interval period, the matrix of intended allocation will be informed to the investors by way of an addendum and to SEBI prior to opening of Specified Transaction Period.

**Risk Profile of the Scheme**

Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. Please read the SID carefully for details on Risk Factors before investment. Scheme Specific Risk Factors are as summarised below:

- Credit Risk • Prepayment Risk • Interest Rate Risk • Re-Investment Risk • Settlement Risk • Regulatory Risk

**Risk Mitigation measures by AMC**

Nature of Risk	Risk Mitigation Measures by AMC
<b>Credit Risk:</b> Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations. Instruments with the longer tenure are perceived to have a higher credit risk.	The fund has a rigorous credit research process. The credit team analyses and approves each issuer before investment by the scheme. Further there is a regulatory and internal cap on exposure to each issuer.
<b>Liquidity Risk:</b> The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.	The funds are envisaged to be actively managed portfolios. The liquidity and volatility of a security is an important criteria in security selection process.
<b>Investing in unrated securities:</b> Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities.	The scheme shall not invest in unrated securities.
<b>Settlement Risk:</b> There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.	The AMC has a strong operations team and well laid out processes and system, which mitigate operational risks attached with the settlement process.
